

Corporate Tax Futures Contract Specifications

Contract Name	Corporate Tax Futures
Symbol	TAX (proposed)
Trading Hours	The Corporate Tax Futures will trade as follows (all hours listed in Central Time): <ul style="list-style-type: none">○ Regular Trading Session: 8:30 a.m. – 3:00 p.m. (Monday – Friday)
Multiplier	The contract multiplier for each Corporate Tax Futures Contract is \$250 (USD).
Contract Months	The Corporate Tax Futures Contract will have available for trading quarterly expirations, on the March cycle, listed out 2 ½ years. Thus, ten contracts will be listed at any given time. The first trading day of the new 10 th month contract will begin with the Regular Trading Session on the settlement day of the expiring front month.
Minimum Price Increment	The minimum price increment in the Corporate Tax Futures Contract will be 0.10 index points, which has a value of \$25. For spread trades, the individual legs and net prices may be in increments of 0.10 index points, which has a value of \$25.
Calendar Spreads	Standard calendar spreads are available for trading in the Corporate Tax Futures Contract with same tick functionality. The individual legs and net prices may be in increments of 0.10 index points, which has a value of \$25. Implied orders functionality is enabled.
Block Trades	Block Trades are permitted to be executed in the Corporate Tax Futures Contract given they meet minimum quantity thresholds. The Block Trade minimum threshold for the Corporate Tax Futures Contract is 500 contracts. Block Trades will include a minimum price increment of 0.10 index points, which has a value of \$25.
Exchange for Related Position	Exchange for Related Position (EFRP) transactions will not be available for Corporate Tax Futures Contracts.
Daily Price Limits	There are no price limits during the regular trading session.
Trading Halts	Trading halts for Corporate Tax Futures will be trigger automatically by a Market Wide Circuit Breaker, or manually as determined by MGEX.
Last Trading Day/Termination of Trading	The Last Trading Day for the Corporate Tax Futures Contract will be at 3:00 p.m. on the trading day immediate before the Final Settlement Date (Generally 3:00 p.m. Thursday afternoon on the Thursday preceding the 3 rd Friday of the month).
Final Settlement Date	The Final Settlement Date for the Corporate Tax Futures Contract is generally the Third Friday of the month.
Final Settlement Value	The Settlement Value of the Index is based on the highest marginal US Corporate Tax Rate in effect at the time of settlement (The Rate).

The final value is $((100\% - \text{The Rate}) \times 100)$.

Corporate Tax Futures will cash settle to the Final Settlement Value, as published by MGEX, on the Final Settlement Date. Settlement of the Corporate Tax Futures Contract will result in the transfer of a cash settlement amount on the business day immediately following the Settlement Date. The cash settlement amount will be the final mark to market amount against the final settlement price of the Corporate Tax Futures Contract multiplied by \$250.

Trade at Settlement Transactions (TAS)

Trade at settlement transactions (TAS) will not be available for Corporate Tax Futures Contracts.

Position Accountability

The position accountability levels for Corporate Tax Futures Contracts are as follows:

- Ownership or control at any time of more than 50,000 contracts net long or short in all Corporate Tax Futures Contracts combined.
- Ownership or control of more than 30,000 contracts net long or net short in the expiring Corporate Tax Futures, effective at the start of Hours of Trading for the Friday prior to the Final Settlement Date of the expiring Corporate Tax Futures.
- Ownership or control of more than 10,000 contracts net long or net short in the expiring Corporate Tax Futures, effective at the start of the Hours of Trading for the Business Day immediately preceding the Final Settlement Date of the expiring Corporate Tax Futures.

Reportable Position and Volume Level

Any open position level in the Corporate Tax Futures Contract at the close of trading on any trading day equal to, or in excess of, 25 contracts on either side of the market is required to be reported to the CFTC.

A volume threshold account that has trading volume in the Corporate Tax Futures Contract during a single trading day equal to, or in excess of, 50 contracts is required to be reported to the CFTC.

Index Futures Contracts
Risk Disclosure and
Disclaimer**

The risk of loss in trading commodity futures contracts can be substantial. You should carefully consider the risks of trading commodity futures contracts generally and the unique risks of trading U.S. Corporate Tax Rate Index futures contracts ("TAX Futures Contracts") in particular before entering into any trade. Because there are no comparable products like TAX Futures Contracts which reference and settle to a federal tax rate, there are unknown tax implications and tax treatments associated with trading these contracts. No federal guidance has been issued as to whether this product will qualify for treatment as a hedging transaction. Furthermore, no federal law or guidance exists on the deductibility of the costs incurred in trading TAX Futures Contracts, whether for speculative or hedging purposes. Likewise, the tax treatment related to Tax Futures Contracts for realizing, recognizing or offsetting gains or losses, whether capital or ordinary, is not known. Any of the above risks may result in adverse consequences, including non-deductibility of expenses or losses, and non-favorable tax treatment of gains or losses. EACH MARKET PARTICIPANT WHO CHOOSES TO TRADE TAX FUTURES CONTRACTS DOES SO AT THEIR OWN RISK, AND IS RESPONSIBLE FOR ANY TAX CONSEQUENCES AND REPORTING OF THEIR TRADE ACTIVITY UNDER RELEVANT GOVERNMENT AUTHORITIES AND JURISDICTIONS. THEREFORE, IT IS HIGHLY RECOMMENDED THAT EACH MARKET PARTICIPANT CONSULT THEIR PROFESSIONAL TAX ACCOUNTANT OR ATTORNEY BEFORE TRADING TAX FUTURES CONTRACTS.

AND DISCLAIMER (see end of Chapter)

CHAPTER 85 CORPORATE TAX FUTURES

85.1. AUTHORITY.

Trading in Corporate Tax Futures (base symbol 'TAX') may be conducted under such terms and conditions as the Board of Directors and/or the Exchange will determine, subject to the Commodity Exchange Act, as amended, and CFTC regulations promulgated thereunder.

85.2. SCOPE OF CHAPTER.

This Chapter is limited in its application to Futures trading on the Corporate Tax Rate Index. Electronic trading, clearing, daily settlement, delivery of cash settlement, and any other matters not specifically covered in this Chapter will be governed by the MGEX Rules, or otherwise delegated to the Exchange to establish policies and procedures that implement the MGEX Rules. In the event the provisions of this Chapter conflict with any other MGEX Rules, those listed within this Chapter and as applicable to the TAX Futures Contract supersede such MGEX Rules outside of this Chapter.

85.3. CORPORATE TAX RATE INDEX: DEFINITION.

The Corporate Tax Rate Index (the "Tax Index") tracks the tax imposed for each taxable year by the U.S. federal government on the taxable income of corporations. The Tax Index is calculated based on the highest marginal U.S. corporate tax rate as published in Section 11(b) of the Internal Revenue Code of 1986 (as amended and as it may be further amended from time to time, and any successor statutes thereto). The Tax Index value is calculated by subtracting the corporate tax rate percent in effect on a Business Day from 100% and then multiplied by 100; the sole corporate tax rate used as an input in this calculation is the highest marginal U.S. corporate tax rate. The Tax Index is calculated and distributed each Business Day at 8:00 a.m. Central Time.

85.4. CONTRACT TRADING UNIT.

The unit of trading will be the value of the TAX Futures Contract multiplied by two hundred-fifty U.S. dollars (\$250).

85.5. MINIMUM PRICE INCREMENT.

Except as provided in this Rule, the minimum price increment in the TAX Futures Contract will be 0.10 index points, which has a value of \$25. All prices are quoted in U.S. dollars.

For spread trades, the individual legs and net prices in the TAX Futures Contract may be in increments of 0.10 index points, which has a value of \$25.

85.6. TRADING MONTHS.

The months available for trading in TAX Futures Contracts and the number of months available for trade at one time will be determined by the Exchange.

85.7. TRADING DAYS AND HOURS.

A trading day is a Business Day on which trading of TAX Futures Contracts is permitted. Trading days are determined by the Exchange. The Hours of Trading for TAX Futures Contracts will constitute a single trading session for a Business Day.

Unless otherwise specified by the Exchange in relation to Exchange holidays, the Hours of Trading for TAX Futures will be 8:30 a.m. – 3:00 p.m. Monday – Friday Central Time.

85.8. LAST TRADING DAY.

The last trading day for the TAX Futures Contract ends at 3:00 p.m. Central Time on the trading day immediately before the final settlement date, generally the Thursday preceding the third Friday of a calendar month. Should the last trading day be a holiday, the last trading day will be moved one day prior to Wednesday.

85.9. FINAL SETTLEMENT DATE.

The final settlement date for the TAX Futures Contract is the third Friday of a calendar month. Should the third Friday of the month be a holiday, the final settlement date will be moved one day prior to Thursday, and the last trading day will be moved to Wednesday.

85.10. CASH SETTLEMENT.

TAX Futures Contracts will be cash settled to the final settlement date's Tax Index value, and delivery of the cash settled amount will occur on the Business Day immediately following the final settlement date. The final settlement price of the TAX Futures Contract will be rounded to the nearest \$.01. If the settlement price is not available or the normal settlement procedure cannot be utilized due to a trading disruption or other unusual circumstance, the settlement price will be determined in accordance with Exchange procedures.

The Exchange makes no warranty, express or implied, as to the results of the final Tax Index settlement price. Information included in, or used in the calculation of, such index is obtained from sources believed to be reliable, but the Exchange makes no guarantee as to its accuracy or completeness and will have no liability for any damages, claims, losses (including any indirect or consequential losses), expenses, or delays, whether direct or indirect, foreseen or unforeseen, suffered by any person arising out of any circumstance or occurrence relating to the index or its calculation, or arising out of any errors or delays in calculating or disseminating such index.

85.11. OFFICIAL CLOSING PERIOD.

The official closing period of the TAX Futures Contract will be from 2:59:00 p.m. to 2:59:59 p.m. Central Time.

85.12. DAILY SETTLEMENT PRICE.

The Exchange will calculate the daily settlement price for each TAX Futures Contract in the following manner for each Business Day. The settlement price will be consistent with the minimum fluctuations of the contract.

- A. The settlement price for the lead month will be determined by the volume-weighted average of outright trades and applicable bids and offers made in the closing period on the Electronic Trading System. For purposes of this Rule, the lead month will be determined by the Exchange and is generally the most active month. The lead month will change at the time when the daily volume and open interest in the contract month following the current lead month is greater than the daily volume and open interest in the lead month for two (2) consecutive Business Days. If there is no volume-weighted average of the outright, then the last trade price is compared to the current bid/ask. If the last trade price is outside of the bid/ask spread, then the contract settles to the nearest bid/ask price. If the last trade price is within the bid/ask spread or if a bid/ask is not available, then the contract settles to the last trade price. If there is no last trade price available, then the prior settlement is compared to the current bid/ask. If the prior settlement is outside of the bid/ask spread, then the contract settles to the nearest bid/ask price. If the prior settlement is within the bid/ask spread or if a bid/ask is not available, then the contract settles to the prior settlement price.
- B. All non-lead months are deferred contract months and settle based upon the volume-weighted average of calendar spread transactions made in the closing period on the Electronic Trading System. If there are no relevant calendar spreads, bids and offers in those calendar spreads will be used in conjunction with settlements from any months where a settlement price has been determined to form an implied market in the contract to be settled. These implied markets, along with the outright bid/ask market for the contract, will be used to derive the best possible bid and best possible ask, and the contract will settle at the midpoint of the bid/ask spread.
- C. Notwithstanding the above, if such settlement price is not consistent with the settlements in other months or with market information, or if the settlement was inaccurately determined, a new settlement price may be established at a level consistent with such other settlement prices or market information and a written record setting forth the basis for any modification of such settlement price will be prepared.

- D. The Exchange may in its sole discretion modify the settlement price prior to the start of the day's final clearing process if the settlement price arose from data entry errors made by or on behalf of the Exchange, and modification of the settlement price is necessary to prevent market distortion. A written record will be prepared setting forth the basis for any modification. In addition, the Exchange reserves the right to change which contract month is the lead month when, in its discretion, doing so is in the best interest of the marketplace. If any such change to the lead month is made pursuant to this Rule, the Exchange shall provide notification to the public via the MGEX website or other means it deems effective.

85.13. TRADING HALTS.

If a decline in the S&P 500 Index triggers a market wide circuit breaker, a TAX Futures Contract trading halt will occur.

85.14. OFFSETS AND TRANSFER TRADES.

Positions reported as offsets and/or position change data must be reported to the Clearing House each day by the established deadlines and in a manner that meets the provisions of MGEX Resolution 2101.00.C. Positions that have been offset at the Exchange may not subsequently be re-opened at the Exchange.

Except by same day trade activity, existing TAX Futures positions in an expiring TAX Futures Contract month may not be offset during the period beginning two (2) Business Days prior to the first Business Day of the expiring month and continuing through the end of the settlement date of the expiring TAX Futures Contract ("Prohibition Period"). Clearing Members will be responsible for compliance with this requirement by their omnibus accounts. This prohibition also applies to transfer trades where no change in ownership is involved when the date of execution or exercise of the position being transferred is not the same as the transfer date. Such positions are required to be offset by trading. If such positions are carried on the books of different Clearing Members, the receiving Clearing Member is responsible for compliance with this Rule.

At its sole discretion, the Department of Audits and Investigations may permit an offset during the Prohibition Period via netting, transfer, or position adjustment. Such adjustments are permissible to correct a bona fide clerical or operational error for an amount less than five percent (5.0%) of the published open interest reported the same morning for which the offset will be reported by the Clearing Member's morning position reporting deadline. Moreover, such adjustments are only permissible if the Department of Audits and Investigations reasonably believes the offset will not adversely impact the market. Such permission does not prohibit the Department of Audits and Investigations from investigating or taking disciplinary action for any alleged violation of the Rulebook.

85.15. BLOCK TRADES

For purposes of this Rule, Block Trades are defined as large transactions that are privately negotiated off the Exchange's Electronic Trading System and can only be entered into by Eligible Contract Participants, as defined in Section 1a(18) of the Commodity Exchange Act.

Block Trades are permitted to be executed in the TAX Futures Contract, provided they are in accordance with the following provisions:

- A. A Block Trade must be for a quantity that is at or in excess of the applicable minimum threshold. Orders for different accounts may not be aggregated in order to achieve the minimum transaction size. The Block Trade minimum threshold in the TAX Futures Contract is 500 contracts.
- B. A Party shall not execute any order as a Block Trade for a customer unless such customer has specified that the order be executed as a Block Trade.
- C. The Block Trade is executed competitively at a price that is fair and reasonable with consideration to the prevailing market price of the TAX Futures Contract. The minimum price increment for a Block Trade in the TAX Futures Contract is 0.10 index points.
- D. Block Trades will not trigger conditional orders or otherwise affect orders in the underlying TAX Futures Contract traded on the Electronic Trading System.
- E. Clearing Members must ensure that each side of the Block Trade is reported to the Exchange within fifteen (15) minutes (but in no case later than 3:15 p.m. Central Time) and in the manner specified by the Exchange. The reporting of each side of the Block Trade must include the: contract, contract month, price, quantity of the transaction including quantities for each leg, buy/sell side, CTI and Regular (House) or Segregated (Customer) indicators, account number, the respective Clearing Members, the time of execution, and any other information required in accordance with MGEX Rules.
- F. Each counterparty to a Block Trade must have a separate and independent bona-fide legal or business purpose for entering into the Block Trade.
- G. Parties involved in the solicitation or negotiation of a Block Trade may not disclose the details of such communication to any other party for any purpose other than to facilitate the execution of the Block Trade.

85.16. POSITION ACCOUNTABILITY.

The position accountability levels for TAX Futures Contracts is ownership or control at any time of more than 50,000 contracts net long or net short in all TAX Futures Contracts

combined.

85.17. AGGREGATION OF POSITIONS.

In determining whether any person has exceeded the position accountability levels, all positions in accounts for which such person by power of attorney or otherwise directly or indirectly holds positions or controls trading must be included with the positions held by such person. Such positions accountability levels will apply to positions held by two (2) or more persons acting pursuant to an expressed or implied agreement or understanding, the same as if the positions were held by a single person. The Exchange will follow the CFTC definition of aggregation and the procedures for aggregating positions as described in CFTC regulations as applicable.

85.18. REPORTABLE POSITION AND TRADING VOLUME.

- A. Pursuant to CFTC Regulation 15.03 and Part 17, any open position level in the TAX Futures Contract at the close of trading on any trading day equal to, or in excess of, 25 contracts on either side of the market is required to be reported to the CFTC. All such positions will be reported in a manner and form as designated by the CFTC or the Exchange.
- B. Pursuant to CFTC Regulation 15.04 and Part 17, a volume threshold account that has trading volume in the TAX Futures Contract during a single trading day equal to, or in excess of, 50 contracts is required to be reported to the CFTC. All such positions must be reported in a manner and form as designated by the CFTC or the Exchange.

85.19. CONTRACT MODIFICATIONS.

Specifications are fixed for the duration of the contract month upon the first trade in that contract month. However, a change in any Federal law, regulation, ruling, directive, or order that conflicts with these Rules or specifications will become effective upon notice by the Exchange. Additionally, the Board of Directors and/or the Exchange are granted the authority to change contract specifications as it deems appropriate or necessary, or to conform to any other applicable law, rule, or regulation that conflicts with these Rules or specifications, for any unopened contract month, as well as to change contract specifications for any contract month with open interest upon approval by the CFTC.

To maintain the purpose and viability of the TAX Futures Contract, the Board of Directors and/or the Exchange are granted the authority to change the MGEX Rules not directly affecting contract specifications at any time and implement such change as may be determined.

85.20. EMERGENCIES.

In the event of an emergency, as determined by the Exchange, the Board of Directors will

have the authority and power to follow the procedures described in MGEX [Bylaw 210.02](#). The Board of Directors may delegate such powers as it deems necessary to the Executive Committee, Exchange Officer(s), or other Exchange employees.

An emergency may include, but is not limited to, events of Force Majeure, interference, interruptions, breakage of communication, accident, or any event or occurrence that is causing or may cause disruption in the marketplace.

Additionally, in the event of an emergency, the Board of Directors or its delegate(s) will have the authority and power to utilize such sources, means, or methods that it determines to be in the best interest of the Exchange and the market.

The decision of the Board of Directors, Executive Committee, Exchange Officer(s), or other Exchange employees as delegated, will be final and binding upon all parties. The Exchange will not be liable to any party because of actions and decisions taken in good faith.

U.S. CORPORATE TAX RATE INDEX FUTURES CONTRACTS RISK DISCLOSURE AND DISCLAIMER

The risk of loss in trading commodity futures contracts can be substantial. You should carefully consider the risks of trading commodity futures contracts generally and the unique risks of trading U.S. Corporate Tax Rate Index futures contracts ("TAX Futures Contracts") in particular before entering into any trade. Because there are no comparable products like TAX Futures Contracts which reference and settle to a federal tax rate, there are unknown tax implications and tax treatments associated with trading these contracts.
