## **CHAPTER 87**

### **BRIXX OFFICE INDEX FUTURES**

#### **87.1. AUTHORITY.**

Trading in BRIXX™ Office Index (the “BRIXX Office Index”) Futures may be conducted under such terms and conditions as the Board of Directors and/or the Exchange will determine, subject to the CEA and CFTC regulations promulgated thereunder.

#### **87.2. SCOPE OF CHAPTER.**

This Chapter is limited in its application to Futures trading on the BRIXX Office Index. Electronic trading, clearing, daily settlement, delivery of cash settlement, and any other matters not specifically covered in this Chapter will be governed by the MGEX Rules, or otherwise delegated to the Exchange to establish policies and procedures that implement the MGEX Rules. In the event the provisions of this Chapter conflict with any other MGEX Rules, those listed within this Chapter and as applicable to Futures Contracts on the BRIXX Office Index supersede such MGEX Rules outside of this Chapter.

#### **87.3. BRIXX OFFICE INDEX: DEFINITION.**

The BRIXX Office Index generally consists of 15 (but not less than 10) publicly traded real estate investment trusts / equity companies that are listed on a U.S. Securities Exchange. The BRIXX Office Index seeks to measure the price per square foot of office space value.

#### **87.4. BRIXX OFFICE INDEX: COMPONENT CHANGES.**

The composition of the BRIXX Office Index is determined at the time of its reconstitution, which occurs on the Thursday before the third Friday of each quarter-end month (March, June, September, and December). In the event such Thursday is a holiday, the reconstitution will be moved one day prior to Wednesday. The reconstitution will be effective after the close on the first Business Day following the reconstitution. No changes shall be made to the BRIXX Office Index components except at the quarterly reconstitution unless a component entity closes a merger transaction, files for bankruptcy, or is delisted from its principal exchange (each, a “Corporate Action”). If a Corporate Action takes place prior to the quarterly reconstitution, the affected component shall be replaced with a new eligible component prior to the next trading day. In the event there are no eligible components, the weighting of the removed component will be proportionally redistributed over the remaining index components. A third party shall monitor and make all BRIXX Office Index reconstitutions.

The component weights of the BRIXX Office Index are adjusted and reset on a monthly basis after the close of business on the third Friday of each month. In the event the third Friday of the month is a holiday, the reset will be moved one day prior to Thursday. The newly calculated component weights for the BRIXX Office Index will be effective on the first Business Day following the reset. This monthly reset adjusts the weights of the BRIXX Office Index components, but no changes, additions, or deletions are made to the individual components.

Should an index reconstitution result in the BRIXX Office Index becoming a narrow-based security index as defined in section 1a(35) of the CEA, the Exchange would follow applicable CFTC regulations governing the transition period for trading purposes.

#### **87.5. CONTRACT TRADING UNIT.**

The unit of trading will be the value of BRIXX Office Index Futures Contracts multiplied by one hundred U.S. dollars (\$100.00).

#### **87.6. MINIMUM PRICE INCREMENT.**

Except as provided in this Rule, the minimum price increment in BRIXX Office Index Futures Contracts will be 0.10 index points, which has a value of \$10.00. All prices are quoted in U.S. dollars.

#### **87.7. TRADING MONTHS.**

The months available for trading in BRIXX Office Index Futures Contracts and the number of months available for trade at one time will be determined by the Exchange.

#### **87.8. TRADING DAYS AND HOURS.**

A trading day is a Business Day on which trading of BRIXX Office Index Futures Contracts is permitted. Trading days are determined by the Exchange. The Hours of Trading for BRIXX Office Index Futures Contracts will constitute a single trading session for a Business Day.

Unless otherwise specified by the Exchange in relation to Exchange holidays, the Hours of Trading for BRIXX Office Index Futures Contracts will be 8:30 a.m. – 3:00 p.m. Monday – Friday Central Time.

#### **87.9. LAST TRADING DAY.**

The last trading day ends at 3:00 p.m. Central Time for BRIXX Office Index Futures Contracts on the trading day immediately before the final settlement date, generally the Thursday preceding the third Friday of a calendar month. Should the last trading day be a holiday, the last trading day will be moved one day prior to Wednesday.

#### **87.10. FINAL SETTLEMENT DATE.**

The final settlement date for BRIXX Office Index Futures Contracts is the third Friday of a calendar month. Should the third Friday of the month be a holiday, the final settlement date will be moved one day prior to Thursday, and the last trading day will be moved to Wednesday.

#### **87.11. CASH SETTLEMENT.**

BRIXX Office Index Futures are cash settled. The final cash settlement price of the expiring BRIXX Office Index Futures Contract is determined by the official opening prices of the BRIXX Office Index components as traded on their primary markets. If a component stock of the BRIXX Office Index does not trade, then the price used for the component stock shall be the prior trading session's closing price. The final cash settlement price of BRIXX Office Index Futures Contracts will be rounded to the nearest \$.01. If the final cash settlement price is not available or the normal settlement procedure cannot be utilized due to a trading disruption or other unusual circumstance, the settlement price will be determined in accordance with Exchange procedures.

The Exchange makes no warranty, express or implied, as to the results of the final settlement prices of the BRIXX Office Index. Information included in, or used in the calculation of, such

indexes is obtained from sources believed to be reliable, but the Exchange makes no guarantee as to its accuracy or completeness and will have no liability for any damages, claims, losses (including any indirect or consequential losses), expenses, or delays, whether direct or indirect, foreseen or unforeseen, suffered by any person arising out of any circumstance or occurrence relating to the index or its calculation, or arising out of any errors or delays in calculating or disseminating such index.

#### **87.12. DAILY SETTLEMENT PRICE.**

The Exchange will calculate the daily settlement price for BRIXX Office Index Futures Contracts in the following manner for each Business Day. The settlement price will be consistent with the minimum fluctuations of the contract.

- A. The settlement price for the lead month will be determined by the volume-weighted average of outright trades and applicable bids and offers made in the closing period on the Electronic Trading System. For purposes of this Rule, the lead month will be determined by the Exchange and is generally the most active month. The lead month will change at the time when the daily volume and open interest in the contract month following the current lead month is greater than the daily volume and open interest in the lead month for two (2) consecutive Business Days. If there is no volume-weighted average of the outright, then the last trade price is compared to the current bid/ask. If the last trade price is outside of the bid/ask spread, then the contract settles to the nearest bid/ask price. If the last trade price is within the bid/ask spread or if a bid/ask is not available, then the contract settles to the last trade price. If there is no last trade price available, then the prior settlement is compared to the current bid/ask. If the prior settlement is outside of the bid/ask spread, then the contract settles to the nearest bid/ask price. If the prior settlement is within the bid/ask spread or if a bid/ask is not available, then the contract settles to the prior settlement price.
- B. All non-lead months are deferred contract months and settle based upon the volume-weighted average of calendar spread transactions made in the closing period on the Electronic Trading System. If there are no relevant calendar spreads, bids and offers in those calendar spreads will be used in conjunction with settlements from any months where a settlement price has been determined to form an implied market in the contract to be settled. These implied markets, along with the outright bid/ask market for the contract, will be used to derive the best possible bid and best possible ask, and the contract will settle at the midpoint of the bid/ask spread.
- C. Notwithstanding the above, if such settlement price is not consistent with the settlements in other months or with market information, or if the settlement was inaccurately determined, a new settlement price may be established at a level consistent with such other settlement prices or market information, and a written record setting forth the basis for any modification of such settlement price will be prepared.
- D. The Exchange may in its sole discretion modify the settlement price prior to the start of the day's final clearing process if the settlement price arose from data entry errors made by or on behalf of the Exchange, and modification of the settlement price is necessary to prevent market distortion. A written record will be prepared setting forth the basis for any modification. In addition, the Exchange reserves the right to change which contract month is the lead month when, in its discretion,

doing so is in the best interest of the marketplace. If any such change to the lead month is made pursuant to this Rule, the Exchange shall provide notification to the public via the MGEX website or other means it deems effective.

### **87.13. TRADING HALTS.**

Trading halts for BRIXX Office Index Futures Contracts can be triggered by volatility in the S&P 500 Index, including the following market declines:

- A. Level 1: 15-minute trading halt following a seven percent (7%) decline in the S&P 500 Index (unless decline occurs after 2:25 p.m. Central Time or 11:25 a.m. Central Time in the case of early close).
- B. Level 2: 15-minute trading halt following a thirteen percent (13%) decline in the S&P 500 Index (unless decline occurs after 2:25 p.m. Central Time or 11:25 a.m. Central Time in the case of early close).
- C. Level 3: Trading halt for the remainder of the trading session following a twenty percent (20%) decline in the S&P 500 Index, effective during all regular Hours of Trading.

### **87.14. OFFSETS AND TRANSFER TRADES.**

Positions reported as offsets and/or position change data must be reported to the Clearing House each day by the established deadlines and in a manner that meets the provisions of MGEX Resolution 2101.00.C. Positions that have been offset at the Exchange may not subsequently be re-opened at the Exchange.

Except by same day trade activity, existing BRIXX Office Index Futures positions in an expiring BRIXX Office Index Futures Contract month may not be offset during the period beginning two (2) Business Days prior to the first Business Day of the expiring month and continuing through the end of the settlement date of the expiring BRIXX Office Index Futures Contracts ("Prohibition Period"). Clearing Members will be responsible for compliance with this requirement by their omnibus accounts. This prohibition also applies to transfer trades where no change in ownership is involved when the date of execution or exercise of the position being transferred is not the same as the transfer date. Such positions are required to be offset by trading. If such positions are carried on the books of different Clearing Members, the receiving Clearing Member is responsible for compliance with this Rule.

At its sole discretion, the Department of Audits and Investigations may permit an offset during the Prohibition Period via netting, transfer, or position adjustment. Such adjustments are permissible to correct a bona fide clerical or operational error for an amount less than five percent (5.0%) of the published open interest reported the same morning for which the offset will be reported by the Clearing Member's morning position reporting deadline. Moreover, such adjustments are only permissible if the Department of Audits and Investigations reasonably believes the offset will not adversely impact the market. Such permission does not prohibit the Department of Audits and Investigations from investigating or taking disciplinary action for any alleged violation of the Rulebook.

### **87.15. BLOCK TRADES.**

For purposes of this Rule, Block Trades are defined as large transactions that are privately negotiated off the Exchange's Electronic Trading System and can only be entered into by Eligible Contract Participants, as defined in Section 1a(18) of the Commodity Exchange Act.

Block Trades are permitted to be executed in BRIXX Office Index Futures Contracts, provided they are in accordance with the following provisions:

- A. A Block Trade must be for a quantity that is at or in excess of the applicable minimum threshold. Orders for different accounts may not be aggregated in order to achieve the minimum transaction size. The Block Trade minimum threshold in BRIXX Office Index Futures Contracts is 500 contracts.
- B. A Party shall not execute any order as a Block Trade for a customer unless such customer has specified that the order be executed as a Block Trade.
- C. The Block Trade is executed competitively at a price that is fair and reasonable with consideration to the prevailing market price of BRIXX Office Index Futures Contracts. The minimum price increment for a Block Trade in BRIXX Office Index Futures Contracts is 0.10 index points.
- D. Block Trades will not trigger conditional orders or otherwise affect orders in the underlying BRIXX Office Index Futures Contract traded on the Electronic Trading System.
- E. Clearing Members must ensure that each side of the Block Trade is reported to the Exchange within fifteen (15) minutes (but in no case later than 3:15 p.m. Central Time) and in the manner specified by the Exchange. The reporting of each side of the Block Trade must include the: contract, contract month, price, quantity of the transaction including quantities for each leg, buy/sell side, CTI and Regular (House) or Segregated (Customer) indicators, account number, the respective Clearing Members, the time of execution, and any other information required in accordance with MGEX Rules.
- F. Each counterparty to a Block Trade must have a separate and independent bona-fide legal or business purpose for entering into the Block Trade.
- G. Parties involved in the solicitation or negotiation of a Block Trade may not disclose the details of such communication to any other party for any purpose other than to facilitate the execution of the Block Trade.

### **87.16. POSITION ACCOUNTABILITY.**

The position accountability levels for BRIXX Office Index Futures Contracts are as follows:

- A. Ownership or control at any time of more than 25,000 contracts net long or short in all BRIXX Office Index Futures Contracts Combined.
- B. Ownership or control of more than 15,000 contracts net long or net short in the expiring BRIXX Office Index Futures, effective at the start of Hours of Trading for the Friday prior to the Final Settlement Date of the expiring BRIXX Office Index Futures.

- C. Ownership or control of more than 5,000 net long or net short in the expiring BRIXX Office Index Futures, effective at the start of the Hours of Trading for the Business Day immediately preceding the Final Settlement Date of the expiring BRIXX Office Index Futures.

#### **87.17. AGGREGATION OF POSITIONS.**

In determining whether any person has exceeded the position accountability levels, all positions in accounts for which such person by power of attorney or otherwise directly or indirectly holds positions or controls trading must be included with the positions held by such person. Such positions accountability levels will apply to positions held by two (2) or more persons acting pursuant to an expressed or implied agreement or understanding, the same as if the positions were held by a single person. The Exchange will follow the CFTC definition of aggregation and the procedures for aggregating positions as described in CFTC regulations as applicable.

#### **87.18. REPORTABLE POSITION AND TRADING VOLUME.**

- A. Pursuant to CFTC Regulation 15.03 and Part 17, any open position level in BRIXX Office Index Futures Contracts at the close of trading on any trading day equal to, or in excess of, 25 contracts on either side of the market is required to be reported to the CFTC. All such positions will be reported in a manner and form as designated by the CFTC or the Exchange.
- B. Pursuant to CFTC Regulation 15.04 and Part 17, a volume threshold account that has trading volume in BRIXX Office Index Futures Contracts during a single trading day equal to, or in excess of, 50 contracts is required to be reported to the CFTC. All such positions must be reported in a manner and form as designated by the CFTC or the Exchange.

#### **87.19. CONTRACT MODIFICATIONS.**

Specifications are fixed for the duration of the contract month upon the first trade in that contract month. However, a change in any Federal law, regulation, ruling, directive, or order that conflicts with these Rules or specifications will become effective upon notice by the Exchange. Additionally, the Board of Directors and/or the Exchange are granted the authority to change contract specifications as it deems appropriate or necessary, or to conform to any other applicable law, rule, or regulation that conflicts with these Rules or specifications, for any unopened contract month, as well as to change contract specifications for any contract month with open interest upon approval by the CFTC.

To maintain the purpose and viability of BRIXX Office Index Futures Contracts, the Board of Directors and/or the Exchange are granted the authority to change the MGEX Rules not directly affecting contract specifications at any time and implement such change as may be determined.

#### **87.20. EMERGENCIES.**

In the event of an emergency, as determined by the Exchange, the Board of Directors will have the authority and power to follow the procedures described in MGEX Bylaw 2.4. The Board of Directors may delegate such powers as it deems necessary to the Executive Committee, Exchange Officer(s), or other Exchange employees.

An emergency may include, but is not limited to, events of Force Majeure, interference, interruptions, breakage of communication, accident, or any event or occurrence that is causing or may cause disruption in the marketplace.

Additionally, in the event of an emergency, the Board of Directors or its delegate(s) will have the authority and power to utilize such sources, means, or methods that it determines to be in the best interest of the Exchange and the market.

The decision of the Board of Directors, Executive Committee, Exchange Officer(s), or other Exchange employees as delegated, will be final and binding upon all parties. The Exchange will not be liable to any party because of actions and decisions taken in good faith.

## **CHAPTER 88**

### **BRIXX RESIDENTIAL INDEX FUTURES**

#### **88.1. AUTHORITY.**

Trading in BRIXX™ Residential Index (the “BRIXX Residential Index”) Futures may be conducted under such terms and conditions as the Board of Directors and/or the Exchange will determine, subject to the CEA and CFTC regulations promulgated thereunder.

#### **88.2. SCOPE OF CHAPTER.**

This Chapter is limited in its application to Futures trading on the BRIXX Residential Index. Electronic trading, clearing, daily settlement, delivery of cash settlement, and any other matters not specifically covered in this Chapter will be governed by the MGEX Rules, or otherwise delegated to the Exchange to establish policies and procedures that implement the MGEX Rules. In the event the provisions of this Chapter conflict with any other MGEX Rules, those listed within this Chapter and as applicable to Futures Contracts on the BRIXX Residential Index supersede such MGEX Rules outside of this Chapter.

#### **88.3. BRIXX RESIDENTIAL INDEX: DEFINITION.**

The BRIXX Residential Index generally consists of 15 (but not less than 10) publicly traded real estate investment trusts / equity companies that are listed on a U.S. Securities Exchange. The BRIXX Residential Index seeks to measure the price per unit of residential space.

#### **88.4. BRIXX RESIDENTIAL INDEX: COMPONENT CHANGES.**

The composition of the BRIXX Residential Index is determined at the time of its reconstitution, which occurs on the Thursday before the third Friday of each quarter-end month (March, June, September, and December). In the event such Thursday is a holiday, the reconstitution will be moved one day prior to Wednesday. The reconstitution will be effective after the close on the first Business Day following the reconstitution. No changes shall be made to the BRIXX Residential Index components except at the quarterly reconstitution unless a component entity closes a merger transaction, files for bankruptcy, or is delisted from its principal exchange (each, a “Corporate Action”). If a Corporate Action takes place prior to the quarterly reconstitution, the affected component shall be replaced with a new eligible component prior to the next trading day. In the event there are no eligible components, the weighting of the removed component will be proportionally redistributed over the remaining index components. A third party shall monitor and make all BRIXX Residential Index reconstitutions.

The component weights of the BRIXX Residential Index are adjusted and reset on a monthly basis after the close of business on the third Friday of each month. In the event the third Friday of the month is a holiday, the reset will be moved one day prior to Thursday. The newly calculated component weights for the BRIXX Residential Index will be effective on the first Business Day following the reset. This monthly reset adjusts the weights of the BRIXX Residential Index components, but no changes, additions, or deletions are made to the individual components.

Should an index reconstitution result in the BRIXX Residential Index becoming a narrow-based security index as defined in section 1a(35) of the CEA, the Exchange would follow applicable CFTC regulations governing the transition period for trading purposes.

#### **88.5. CONTRACT TRADING UNIT.**

The unit of trading will be the value of BRIXX Residential Index Futures Contracts multiplied by one hundred U.S. dollars (\$100.00).

#### **88.6. MINIMUM PRICE INCREMENT.**

Except as provided in this Rule, the minimum price increment in BRIXX Residential Index Futures Contracts will be 0.10 index points, which has a value of \$10.00. All prices are quoted in U.S. dollars.

#### **88.7. TRADING MONTHS.**

The months available for trading in BRIXX Residential Index Futures Contracts and the number of months available for trade at one time will be determined by the Exchange.

#### **88.8. TRADING DAYS AND HOURS.**

A trading day is a Business Day on which trading of BRIXX Residential Index Futures Contracts is permitted. Trading days are determined by the Exchange. The Hours of Trading for BRIXX Residential Index Futures Contracts will constitute a single trading session for a Business Day.

Unless otherwise specified by the Exchange in relation to Exchange holidays, the Hours of Trading for BRIXX Residential Index Futures Contracts will be 8:30 a.m. – 3:00 p.m. Monday – Friday Central Time.

#### **88.9. LAST TRADING DAY.**

The last trading day ends at 3:00 p.m. Central Time for BRIXX Residential Index Futures Contracts on the trading day immediately before the final settlement date, generally the Thursday preceding the third Friday of a calendar month. Should the last trading day be a holiday, the last trading day will be moved one day prior to Wednesday.

#### **88.10. FINAL SETTLEMENT DATE.**

The final settlement date for BRIXX Residential Index Futures Contracts is the third Friday of a calendar month. Should the third Friday of the month be a holiday, the final settlement date will be moved one day prior to Thursday, and the last trading day will be moved to Wednesday.

#### **88.11. CASH SETTLEMENT.**

BRIXX Residential Index Futures are cash settled. The final cash settlement price of the expiring BRIXX Residential Index Futures Contract is determined by the official opening prices of the BRIXX Residential Index components as traded on their primary markets. If a component stock of the BRIXX Residential Index does not trade, then the price used for the component stock shall be the prior trading session's closing price. The final cash settlement price of BRIXX Residential Index Futures Contracts will be rounded to the nearest \$.01. If the final cash settlement price is not available or the normal settlement procedure cannot be utilized due to a trading disruption or other unusual circumstance, the settlement price will be determined in accordance with Exchange

procedures.

The Exchange makes no warranty, express or implied, as to the results of the final settlement prices of the BRIXX Residential Index. Information included in, or used in the calculation of, such indexes is obtained from sources believed to be reliable, but the Exchange makes no guarantee as to its accuracy or completeness and will have no liability for any damages, claims, losses (including any indirect or consequential losses), expenses, or delays, whether direct or indirect, foreseen or unforeseen, suffered by any person arising out of any circumstance or occurrence relating to the index or its calculation, or arising out of any errors or delays in calculating or disseminating such index.

#### **88.12. DAILY SETTLEMENT PRICE.**

The Exchange will calculate the daily settlement price for BRIXX Residential Index Futures Contracts in the following manner for each Business Day. The settlement price will be consistent with the minimum fluctuations of the contract.

- A. The settlement price for the lead month will be determined by the volume-weighted average of outright trades and applicable bids and offers made in the closing period on the Electronic Trading System. For purposes of this Rule, the lead month will be determined by the Exchange and is generally the most active month. The lead month will change at the time when the daily volume and open interest in the contract month following the current lead month is greater than the daily volume and open interest in the lead month for two (2) consecutive Business Days. If there is no volume-weighted average of the outright, then the last trade price is compared to the current bid/ask. If the last trade price is outside of the bid/ask spread, then the contract settles to the nearest bid/ask price. If the last trade price is within the bid/ask spread or if a bid/ask is not available, then the contract settles to the last trade price. If there is no last trade price available, then the prior settlement is compared to the current bid/ask. If the prior settlement is outside of the bid/ask spread, then the contract settles to the nearest bid/ask price. If the prior settlement is within the bid/ask spread or if a bid/ask is not available, then the contract settles to the prior settlement price.
- B. All non-lead months are deferred contract months and settle based upon the volume-weighted average of calendar spread transactions made in the closing period on the Electronic Trading System. If there are no relevant calendar spreads, bids and offers in those calendar spreads will be used in conjunction with settlements from any months where a settlement price has been determined to form an implied market in the contract to be settled. These implied markets, along with the outright bid/ask market for the contract, will be used to derive the best possible bid and best possible ask, and the contract will settle at the midpoint of the bid/ask spread.
- C. Notwithstanding the above, if such settlement price is not consistent with the settlements in other months or with market information, or if the settlement was inaccurately determined, a new settlement price may be established at a level consistent with such other settlement prices or market information, and a written record setting forth the basis for any modification of such settlement price will be prepared.
- D. The Exchange may in its sole discretion modify the settlement price prior to the

start of the day's final clearing process if the settlement price arose from data entry errors made by or on behalf of the Exchange, and modification of the settlement price is necessary to prevent market distortion. A written record will be prepared setting forth the basis for any modification. In addition, the Exchange reserves the right to change which contract month is the lead month when, in its discretion, doing so is in the best interest of the marketplace. If any such change to the lead month is made pursuant to this Rule, the Exchange shall provide notification to the public via the MGEX website or other means it deems effective.

### **88.13. TRADING HALTS.**

Trading halts for BRIXX Residential Index Futures Contracts can be triggered by volatility in the S&P 500 Index, including the following market declines:

- A. Level 1: 15-minute trading halt following a seven percent (7%) decline in the S&P 500 Index (unless decline occurs after 2:25 p.m. Central Time or 11:25 a.m. Central Time in the case of early close).
- B. Level 2: 15-minute trading halt following a thirteen percent (13%) decline in the S&P 500 Index (unless decline occurs after 2:25 p.m. Central Time or 11:25 a.m. Central Time in the case of early close).
- C. Level 3: Trading halt for the remainder of the trading session following a twenty percent (20%) decline in the S&P 500 Index, effective during all regular Hours of Trading.

### **88.14. OFFSETS AND TRANSFER TRADES.**

Positions reported as offsets and/or position change data must be reported to the Clearing House each day by the established deadlines and in a manner that meets the provisions of MGEX Resolution 2101.00.C. Positions that have been offset at the Exchange may not subsequently be re-opened at the Exchange.

Except by same day trade activity, existing BRIXX Residential Index Futures positions in an expiring BRIXX Residential Index Futures Contract month may not be offset during the period beginning two (2) Business Days prior to the first Business Day of the expiring month and continuing through the end of the settlement date of the expiring BRIXX Residential Index Futures Contracts ("Prohibition Period"). Clearing Members will be responsible for compliance with this requirement by their omnibus accounts. This prohibition also applies to transfer trades where no change in ownership is involved when the date of execution or exercise of the position being transferred is not the same as the transfer date. Such positions are required to be offset by trading. If such positions are carried on the books of different Clearing Members, the receiving Clearing Member is responsible for compliance with this Rule.

At its sole discretion, the Department of Audits and Investigations may permit an offset during the Prohibition Period via netting, transfer, or position adjustment. Such adjustments are permissible to correct a bona fide clerical or operational error for an amount less than five percent (5.0%) of the published open interest reported the same morning for which the offset will be reported by the Clearing Member's morning position reporting deadline. Moreover, such adjustments are only permissible if the Department of Audits and Investigations reasonably believes the offset will not adversely impact the market. Such permission does not prohibit the Department of Audits and

Investigations from investigating or taking disciplinary action for any alleged violation of the Rulebook.

#### **88.15. BLOCK TRADES.**

For purposes of this Rule, Block Trades are defined as large transactions that are privately negotiated off the Exchange's Electronic Trading System and can only be entered into by Eligible Contract Participants, as defined in Section 1a(18) of the Commodity Exchange Act.

Block Trades are permitted to be executed in BRIXX Residential Index Futures Contracts, provided they are in accordance with the following provisions:

- A. A Block Trade must be for a quantity that is at or in excess of the applicable minimum threshold. Orders for different accounts may not be aggregated in order to achieve the minimum transaction size. The Block Trade minimum threshold in BRIXX Residential Index Futures Contracts is 500 contracts.
- B. A Party shall not execute any order as a Block Trade for a customer unless such customer has specified that the order be executed as a Block Trade.
- C. The Block Trade is executed competitively at a price that is fair and reasonable with consideration to the prevailing market price of BRIXX Residential Index Futures Contracts. The minimum price increment for a Block Trade in BRIXX Residential Index Futures Contracts is 0.10 index points.
- D. Block Trades will not trigger conditional orders or otherwise affect orders in the underlying BRIXX Residential Index Futures Contract traded on the Electronic Trading System.
- E. Clearing Members must ensure that each side of the Block Trade is reported to the Exchange within fifteen (15) minutes (but in no case later than 3:15 p.m. Central Time) and in the manner specified by the Exchange. The reporting of each side of the Block Trade must include the: contract, contract month, price, quantity of the transaction including quantities for each leg, buy/sell side, CTI and Regular (House) or Segregated (Customer) indicators, account number, the respective Clearing Members, the time of execution, and any other information required in accordance with MGEX Rules.
- F. Each counterparty to a Block Trade must have a separate and independent bona-fide legal or business purpose for entering into the Block Trade.
- G. Parties involved in the solicitation or negotiation of a Block Trade may not disclose the details of such communication to any other party for any purpose other than to facilitate the execution of the Block Trade.

#### **88.16. POSITION ACCOUNTABILITY.**

The position accountability levels for BRIXX Residential Index Futures Contracts are as follows:

- A. Ownership or control at any time of more than 25,000 contracts net long or short in all BRIXX Residential Index Futures Contracts Combined.

- B. Ownership or control of more than 15,000 contracts net long or net short in the expiring BRIXX Residential Index Futures, effective at the start of Hours of Trading for the Friday prior to the Final Settlement Date of the expiring BRIXX Residential Index Futures.
- C. Ownership or control of more than 5,000 net long or net short in the expiring BRIXX Residential Index Futures, effective at the start of the Hours of Trading for the Business Day immediately preceding the Final Settlement Date of the expiring BRIXX Residential Index Futures.

#### **88.17. AGGREGATION OF POSITIONS.**

In determining whether any person has exceeded the position accountability levels, all positions in accounts for which such person by power of attorney or otherwise directly or indirectly holds positions or controls trading must be included with the positions held by such person. Such positions accountability levels will apply to positions held by two (2) or more persons acting pursuant to an expressed or implied agreement or understanding, the same as if the positions were held by a single person. The Exchange will follow the CFTC definition of aggregation and the procedures for aggregating positions as described in CFTC regulations as applicable.

#### **88.18. REPORTABLE POSITION AND TRADING VOLUME.**

- A. Pursuant to CFTC Regulation 15.03 and Part 17, any open position level in BRIXX Residential Index Futures Contracts at the close of trading on any trading day equal to, or in excess of, 25 contracts on either side of the market is required to be reported to the CFTC. All such positions will be reported in a manner and form as designated by the CFTC or the Exchange.
- B. Pursuant to CFTC Regulation 15.04 and Part 17, a volume threshold account that has trading volume in BRIXX Residential Index Futures Contracts during a single trading day equal to, or in excess of, 50 contracts is required to be reported to the CFTC. All such positions must be reported in a manner and form as designated by the CFTC or the Exchange.

#### **88.19. CONTRACT MODIFICATIONS.**

Specifications are fixed for the duration of the contract month upon the first trade in that contract month. However, a change in any Federal law, regulation, ruling, directive, or order that conflicts with these Rules or specifications will become effective upon notice by the Exchange. Additionally, the Board of Directors and/or the Exchange are granted the authority to change contract specifications as it deems appropriate or necessary, or to conform to any other applicable law, rule, or regulation that conflicts with these Rules or specifications, for any unopened contract month, as well as to change contract specifications for any contract month with open interest upon approval by the CFTC.

To maintain the purpose and viability of BRIXX Residential Index Futures Contracts, the Board of Directors and/or the Exchange are granted the authority to change the MGEX Rules not directly affecting contract specifications at any time and implement such change as may be determined.

## **88.20. EMERGENCIES.**

In the event of an emergency, as determined by the Exchange, the Board of Directors will have the authority and power to follow the procedures described in MGEX Bylaw 2.4. The Board of Directors may delegate such powers as it deems necessary to the Executive Committee, Exchange Officer(s), or other Exchange employees.

An emergency may include, but is not limited to, events of Force Majeure, interference, interruptions, breakage of communication, accident, or any event or occurrence that is causing or may cause disruption in the marketplace.

Additionally, in the event of an emergency, the Board of Directors or its delegate(s) will have the authority and power to utilize such sources, means, or methods that it determines to be in the best interest of the Exchange and the market.

The decision of the Board of Directors, Executive Committee, Exchange Officer(s), or other Exchange employees as delegated, will be final and binding upon all parties. The Exchange will not be liable to any party because of actions and decisions taken in good faith.

## **CHAPTER 89 BRIXX HOSPITALITY INDEX FUTURES**

### **89.1. AUTHORITY.**

Trading in BRIXX™ Hospitality Index (the “BRIXX Hospitality Index”) Futures may be conducted under such terms and conditions as the Board of Directors and/or the Exchange will determine, subject to the CEA and CFTC regulations promulgated thereunder.

### **89.2. SCOPE OF CHAPTER.**

This Chapter is limited in its application to Futures trading on the BRIXX Hospitality Index. Electronic trading, clearing, daily settlement, delivery of cash settlement, and any other matters not specifically covered in this Chapter will be governed by the MGEX Rules, or otherwise delegated to the Exchange to establish policies and procedures that implement the MGEX Rules. In the event the provisions of this Chapter conflict with any other MGEX Rules, those listed within this Chapter and as applicable to Futures Contracts on the BRIXX Hospitality Index supersede such MGEX Rules outside of this Chapter.

### **89.3. BRIXX HOSPITALITY INDEX: DEFINITION.**

The BRIXX Hospitality Index generally consists of 15 (but not less than 10) publicly traded real estate investment trusts / equity companies that are listed on a U.S. Securities Exchange. The BRIXX Hospitality Index seeks to measure the price per room key of hotel space.

### **89.4. BRIXX HOSPITALITY INDEX: COMPONENT CHANGES.**

The composition of the BRIXX Hospitality Index is determined at the time of its reconstitution, which occurs on the Thursday before the third Friday of each quarter-end month (March, June, September, and December). In the event such Thursday is a holiday, the reconstitution will be moved one day prior to Wednesday. The reconstitution will be effective after the close on the first Business Day following the reconstitution. No changes shall be made to the BRIXX Hospitality Index components except at the quarterly reconstitution unless a component entity closes a merger transaction, files for bankruptcy, or is delisted from its principal exchange (each, a “Corporate Action”). If a Corporate Action takes place prior to the quarterly reconstitution, the affected component shall be replaced with a new eligible component prior to the next trading day. In the event there are no eligible components, the weighting of the removed component will be proportionally redistributed over the remaining index components. A third party shall monitor and make all BRIXX Hospitality Index reconstitutions.

The component weights of the BRIXX Hospitality Index are adjusted and reset on a monthly basis after the close of business on the third Friday of each month. In the event the third Friday of the month is a holiday, the reset will be moved one day prior to Thursday. The newly calculated component weights for the BRIXX Hospitality Index will be effective on the first Business Day following the reset. This monthly reset adjusts the weights of the BRIXX Hospitality Index components, but no changes, additions, or deletions are made to the individual components.

Should an index reconstitution result in the BRIXX Hospitality Index becoming a narrow-based security index as defined in section 1a(35) of the CEA, the Exchange would follow applicable CFTC regulations governing the transition period for trading purposes.

#### **89.5. CONTRACT TRADING UNIT.**

The unit of trading will be the value of BRIXX Hospitality Index Futures Contracts multiplied by one hundred U.S. dollars (\$100.00).

#### **89.6. MINIMUM PRICE INCREMENT.**

Except as provided in this Rule, the minimum price increment in BRIXX Hospitality Index Futures Contracts will be 0.10 index points, which has a value of \$10.00. All prices are quoted in U.S. dollars.

#### **89.7. TRADING MONTHS.**

The months available for trading in BRIXX Hospitality Index Futures Contracts and the number of months available for trade at one time will be determined by the Exchange.

#### **89.8. TRADING DAYS AND HOURS.**

A trading day is a Business Day on which trading of BRIXX Hospitality Index Futures Contracts is permitted. Trading days are determined by the Exchange. The Hours of Trading for BRIXX Hospitality Index Futures Contracts will constitute a single trading session for a Business Day.

Unless otherwise specified by the Exchange in relation to Exchange holidays, the Hours of Trading for BRIXX Hospitality Index Futures Contracts will be 8:30 a.m. – 3:00 p.m. Monday – Friday Central Time.

#### **89.9. LAST TRADING DAY.**

The last trading day ends at 3:00 p.m. Central Time for BRIXX Hospitality Index Futures Contracts on the trading day immediately before the final settlement date, generally the Thursday preceding the third Friday of a calendar month. Should the last trading day be a holiday, the last trading day will be moved one day prior to Wednesday.

#### **89.10. FINAL SETTLEMENT DATE.**

The final settlement date for BRIXX Hospitality Index Futures Contracts is the third Friday of a calendar month. Should the third Friday of the month be a holiday, the final settlement date will be moved one day prior to Thursday, and the last trading day will be moved to Wednesday.

#### **89.11. CASH SETTLEMENT.**

BRIXX Hospitality Index Futures are cash settled. The final cash settlement price of the expiring BRIXX Hospitality Index Futures Contract is determined by the official opening prices of the BRIXX Hospitality Index components as traded on their primary markets. If a component stock of the BRIXX Hospitality Index does not trade, then the price used for the component stock shall be the prior trading session's closing price. The final cash settlement price of BRIXX Hospitality Index Futures Contracts will be rounded to the nearest \$.01. If the final cash settlement price is not available or the normal settlement procedure cannot be utilized due to a trading disruption or other unusual circumstance, the settlement price will be determined in accordance with Exchange

procedures.

The Exchange makes no warranty, express or implied, as to the results of the final settlement prices of the BRIXX Hospitality Index. Information included in, or used in the calculation of, such indexes is obtained from sources believed to be reliable, but the Exchange makes no guarantee as to its accuracy or completeness and will have no liability for any damages, claims, losses (including any indirect or consequential losses), expenses, or delays, whether direct or indirect, foreseen or unforeseen, suffered by any person arising out of any circumstance or occurrence relating to the index or its calculation, or arising out of any errors or delays in calculating or disseminating such index.

#### **89.12. DAILY SETTLEMENT PRICE.**

The Exchange will calculate the daily settlement price for BRIXX Hospitality Index Futures Contracts in the following manner for each Business Day. The settlement price will be consistent with the minimum fluctuations of the contract.

- A. The settlement price for the lead month will be determined by the volume-weighted average of outright trades and applicable bids and offers made in the closing period on the Electronic Trading System. For purposes of this Rule, the lead month will be determined by the Exchange and is generally the most active month. The lead month will change at the time when the daily volume and open interest in the contract month following the current lead month is greater than the daily volume and open interest in the lead month for two (2) consecutive Business Days. If there is no volume-weighted average of the outright, then the last trade price is compared to the current bid/ask. If the last trade price is outside of the bid/ask spread, then the contract settles to the nearest bid/ask price. If the last trade price is within the bid/ask spread or if a bid/ask is not available, then the contract settles to the last trade price. If there is no last trade price available, then the prior settlement is compared to the current bid/ask. If the prior settlement is outside of the bid/ask spread, then the contract settles to the nearest bid/ask price. If the prior settlement is within the bid/ask spread or if a bid/ask is not available, then the contract settles to the prior settlement price.
- B. All non-lead months are deferred contract months and settle based upon the volume-weighted average of calendar spread transactions made in the closing period on the Electronic Trading System. If there are no relevant calendar spreads, bids and offers in those calendar spreads will be used in conjunction with settlements from any months where a settlement price has been determined to form an implied market in the contract to be settled. These implied markets, along with the outright bid/ask market for the contract, will be used to derive the best possible bid and best possible ask, and the contract will settle at the midpoint of the bid/ask spread.
- C. Notwithstanding the above, if such settlement price is not consistent with the settlements in other months or with market information, or if the settlement was inaccurately determined, a new settlement price may be established at a level consistent with such other settlement prices or market information, and a written record setting forth the basis for any modification of such settlement price will be prepared.
- D. The Exchange may in its sole discretion modify the settlement price prior to the

start of the day's final clearing process if the settlement price arose from data entry errors made by or on behalf of the Exchange, and modification of the settlement price is necessary to prevent market distortion. A written record will be prepared setting forth the basis for any modification. In addition, the Exchange reserves the right to change which contract month is the lead month when, in its discretion, doing so is in the best interest of the marketplace. If any such change to the lead month is made pursuant to this Rule, the Exchange shall provide notification to the public via the MGEX website or other means it deems effective.

### **89.13. TRADING HALTS.**

Trading halts for BRIXX Hospitality Index Futures Contracts can be triggered by volatility in the S&P 500 Index, including the following market declines:

- A. Level 1: 15-minute trading halt following a seven percent (7%) decline in the S&P 500 Index (unless decline occurs after 2:25 p.m. Central Time or 11:25 a.m. Central Time in the case of early close).
- B. Level 2: 15-minute trading halt following a thirteen percent (13%) decline in the S&P 500 Index (unless decline occurs after 2:25 p.m. Central Time or 11:25 a.m. Central Time in the case of early close).
- C. Level 3: Trading halt for the remainder of the trading session following a twenty percent (20%) decline in the S&P 500 Index, effective during all regular Hours of Trading.

### **89.14. OFFSETS AND TRANSFER TRADES.**

Positions reported as offsets and/or position change data must be reported to the Clearing House each day by the established deadlines and in a manner that meets the provisions of MGEX Resolution 2101.00.C. Positions that have been offset at the Exchange may not subsequently be re-opened at the Exchange.

Except by same day trade activity, existing BRIXX Hospitality Index Futures positions in an expiring BRIXX Hospitality Index Futures Contract month may not be offset during the period beginning two (2) Business Days prior to the first Business Day of the expiring month and continuing through the end of the settlement date of the expiring BRIXX Hospitality Index Futures Contracts ("Prohibition Period"). Clearing Members will be responsible for compliance with this requirement by their omnibus accounts. This prohibition also applies to transfer trades where no change in ownership is involved when the date of execution or exercise of the position being transferred is not the same as the transfer date. Such positions are required to be offset by trading. If such positions are carried on the books of different Clearing Members, the receiving Clearing Member is responsible for compliance with this Rule.

At its sole discretion, the Department of Audits and Investigations may permit an offset during the Prohibition Period via netting, transfer, or position adjustment. Such adjustments are permissible to correct a bona fide clerical or operational error for an amount less than five percent (5.0%) of the published open interest reported the same morning for which the offset will be reported by the Clearing Member's morning position reporting deadline. Moreover, such adjustments are only permissible if the Department of Audits and Investigations reasonably believes the offset will not adversely impact the market. Such permission does not prohibit the Department of Audits and

Investigations from investigating or taking disciplinary action for any alleged violation of the Rulebook.

#### **89.15. BLOCK TRADES.**

For purposes of this Rule, Block Trades are defined as large transactions that are privately negotiated off the Exchange's Electronic Trading System and can only be entered into by Eligible Contract Participants, as defined in Section 1a(18) of the Commodity Exchange Act.

Block Trades are permitted to be executed in BRIXX Hospitality Index Futures Contracts, provided they are in accordance with the following provisions:

- A. A Block Trade must be for a quantity that is at or in excess of the applicable minimum threshold. Orders for different accounts may not be aggregated in order to achieve the minimum transaction size. The Block Trade minimum threshold in BRIXX Hospitality Index Futures Contracts is 500 contracts.
- B. A Party shall not execute any order as a Block Trade for a customer unless such customer has specified that the order be executed as a Block Trade.
- C. The Block Trade is executed competitively at a price that is fair and reasonable with consideration to the prevailing market price of BRIXX Hospitality Index Futures Contracts. The minimum price increment for a Block Trade in BRIXX Hospitality Index Futures Contracts is 0.10 index points.
- D. Block Trades will not trigger conditional orders or otherwise affect orders in the underlying BRIXX Hospitality Index Futures Contract traded on the Electronic Trading System.
- E. Clearing Members must ensure that each side of the Block Trade is reported to the Exchange within fifteen (15) minutes (but in no case later than 3:15 p.m. Central Time) and in the manner specified by the Exchange. The reporting of each side of the Block Trade must include the: contract, contract month, price, quantity of the transaction including quantities for each leg, buy/sell side, CTI and Regular (House) or Segregated (Customer) indicators, account number, the respective Clearing Members, the time of execution, and any other information required in accordance with MGEX Rules.
- F. Each counterparty to a Block Trade must have a separate and independent bona-fide legal or business purpose for entering into the Block Trade.
- G. Parties involved in the solicitation or negotiation of a Block Trade may not disclose the details of such communication to any other party for any purpose other than to facilitate the execution of the Block Trade.

#### **89.16. POSITION ACCOUNTABILITY.**

The position accountability levels for BRIXX Hospitality Index Futures Contracts are as follows:

- A. Ownership or control at any time of more than 25,000 contracts net long or short in all BRIXX Hospitality Index Futures Contracts Combined.

- B. Ownership or control of more than 15,000 contracts net long or net short in the expiring BRIXX Hospitality Index Futures, effective at the start of Hours of Trading for the Friday prior to the Final Settlement Date of the expiring BRIXX Hospitality Index Futures.
- C. Ownership or control of more than 5,000 net long or net short in the expiring BRIXX Hospitality Index Futures, effective at the start of the Hours of Trading for the Business Day immediately preceding the Final Settlement Date of the expiring BRIXX Hospitality Index Futures.

#### **89.17. AGGREGATION OF POSITIONS.**

In determining whether any person has exceeded the position accountability levels, all positions in accounts for which such person by power of attorney or otherwise directly or indirectly holds positions or controls trading must be included with the positions held by such person. Such positions accountability levels will apply to positions held by two (2) or more persons acting pursuant to an expressed or implied agreement or understanding, the same as if the positions were held by a single person. The Exchange will follow the CFTC definition of aggregation and the procedures for aggregating positions as described in CFTC regulations as applicable.

#### **89.18. REPORTABLE POSITION AND TRADING VOLUME.**

- A. Pursuant to CFTC Regulation 15.03 and Part 17, any open position level in BRIXX Hospitality Index Futures Contracts at the close of trading on any trading day equal to, or in excess of, 25 contracts on either side of the market is required to be reported to the CFTC. All such positions will be reported in a manner and form as designated by the CFTC or the Exchange.
- B. Pursuant to CFTC Regulation 15.04 and Part 17, a volume threshold account that has trading volume in BRIXX Hospitality Index Futures Contracts during a single trading day equal to, or in excess of, 50 contracts is required to be reported to the CFTC. All such positions must be reported in a manner and form as designated by the CFTC or the Exchange.

#### **89.19. CONTRACT MODIFICATIONS.**

Specifications are fixed for the duration of the contract month upon the first trade in that contract month. However, a change in any Federal law, regulation, ruling, directive, or order that conflicts with these Rules or specifications will become effective upon notice by the Exchange. Additionally, the Board of Directors and/or the Exchange are granted the authority to change contract specifications as it deems appropriate or necessary, or to conform to any other applicable law, rule, or regulation that conflicts with these Rules or specifications, for any unopened contract month, as well as to change contract specifications for any contract month with open interest upon approval by the CFTC.

To maintain the purpose and viability of BRIXX Hospitality Index Futures Contracts, the Board of Directors and/or the Exchange are granted the authority to change the MGEX Rules not directly affecting contract specifications at any time and implement such change as may be determined.

## **89.20. EMERGENCIES.**

In the event of an emergency, as determined by the Exchange, the Board of Directors will have the authority and power to follow the procedures described in MGEX Bylaw 2.4. The Board of Directors may delegate such powers as it deems necessary to the Executive Committee, Exchange Officer(s), or other Exchange employees.

An emergency may include, but is not limited to, events of Force Majeure, interference, interruptions, breakage of communication, accident, or any event or occurrence that is causing or may cause disruption in the marketplace.

Additionally, in the event of an emergency, the Board of Directors or its delegate(s) will have the authority and power to utilize such sources, means, or methods that it determines to be in the best interest of the Exchange and the market.

The decision of the Board of Directors, Executive Committee, Exchange Officer(s), or other Exchange employees as delegated, will be final and binding upon all parties. The Exchange will not be liable to any party because of actions and decisions taken in good faith.
